

Program

# ISACA ITAF Training

## Overview

The ISACA ITAF Training course is a comprehensive program designed to equip IT audit and assurance professionals with the knowledge, skills, and standards necessary to excel in their roles. This training is based on the 4th Edition of ISACA's Information Technology Audit Framework (ITAF) and covers general standards, performance standards, and reporting standards.

## What You Will Learn?

By the end of this course, participants will:

- Gain a deep understanding of ITAF standards and guidelines.
- Develop the skills to plan, perform, and report on IT audit and assurance engagements.
- Learn how to apply ethical considerations, maintain independence, and exercise due care in IT auditing.
- Understand risk assessment and resource management in IT audit.
- Be proficient in producing various types of audit reports.
- Access and utilize ISACA's resources, tools, and templates effectively.

## Course Key Features

- Downloadable Course Content
- Case studies

## Eligibility

The ISACA ITAF Training is open to professionals interested in IT audit and assurance, including: IT Auditors, Assurance Professionals, Risk Managers, Compliance Officers, Information Security Specialists, IT Governance Professionals
